

Natural Stone, Beautiful Home

www.ThinStoneIreland.ie

ThinStone

Give your home new life with the beauty of natural stone. ThinStone is 100% real stone. Here in Westport, Co Mayo, we cut down the big pieces of stone to a one inch thickness to make ThinStone.

It is thus much lighter in weight than full size building stone, and so it can be fixed directly on to the wall structure. This simplifies the whole building process and reduces the cost significantly. ThinStone is maintenance free and will last a life-time.

Save on cost and time

Because ThinStone does not need a foundation or structural supports over windows and doors, it will make your building or renovation project much more straightforward. ThinStone will give you a saving of 20% to 25% as against using the heavier weight, much more bulky, building stone.

Also, your project will be completed more quickly and on schedule. Because, of its lesser thickness around windows, ThinStone will let much more sunlight in to your rooms and keep your home nice and bright. As well as for house-fronts, ThinStone is also a perfect solution for stone fireplaces, porches and boundary walls.

All of Ireland Service

With ThinStone, you can have the beauty and authenticity of natural stone for your home at a much more affordable cost. We sell, supply and fit ThinStone all over Ireland. Call us for some sound advice on your new build project, your home renovation or your stone fireplace.
