

DECLARATION OF PERFORMANCE

N° 03/2013

In accordance with CPR 305/2011

1. Declared performance of **Benbrack Sandstone**

2. :

<i>Essential features</i>		<i>Performance</i>	<i>Harmonized specifications</i>
Release of dangerous substances		NPD	EN 1341:2013, EN 1342:2013, EN 1343:2013.
Flexural strength	expected minimum value	17,2 MPa	
Durability of flexural strength	average value before frost	16,8 MPa	
	average value after 56 frost cycles	17,5 MPa	
Aparent density	average value	2676 m/3	
Abrasion wear	expected maximum value	14,8 mm	
Water absorption at p.at.	expected maximum value	1.50%	
Compressive strenght	Expected minimum value	122 Mpa	
Durability of compressive strenght	average value before frost	138 Mpa	
	average value after 56 frost cycles	143 Mpa
